Give in to it. Be summoned by an audacious beauty that stirs something within. It will lead you to rewards that can only come from engineering and design that satisfy through your senses. In the redesigned Infiniti Q70, you'll discover a different type of flagship luxury that elevates the tactile and celebrates power and dynamic movement. Trust your impulses. They've been waiting for the exceptional.
INTELLIGENT ALL-WHEEL DRIVE® infinitely adjusts for better traction when you need it and more dynamic handling when you don’t.

INFINITI DIRECT RESPONSE HYBRID® doesn’t require a compromise between efficiency and exhilaration. It pulses with 360 horsepower delivered with heart-pounding immediacy, while achieving up to 7.6 litres/100km. 
ACTIVE NOISE CONTROL seeks to cancel out unwanted noise entering the cabin, so the only thing you hear is the song of performance.

Within every movement is a commitment to inspire every moment. Our insatiable drive for an invigorated connection is revealed when your space is sanctuary and when your fingertips find tools to facilitate your journey. In motion, you will discover dedication.
There’s energy in every moment. An electricity released by the fusion of power and intelligence that takes you farther and faster than either alone. Feel luxury invigorated, not merely accelerated.

ACCELERATION SWELL transforms mechanical power into emotional excitement. Precise engine tuning unleashes torque over a broader rev range, and the feeling of acceleration is shaped to increase the faster you go.

DOWNSHIFT REV MATCHING expertly translates performance driving technique. Flick the magnesium paddle shifter for a lower gear and it blips the throttle to ready the engine for the new gear. Smoother, quicker downshifts mean balance and response.
PREDICTIVE FORWARD COLLISION WARNING\(^1\) scans ahead, even monitoring the vehicle that’s ahead of the one in front of you, to help warn you of potential danger and give you a better chance to avoid a collision.

FORWARD EMERGENCY BRAKING\(^4\) adds another dimension of security in the Infiniti Q70. It detects vehicles ahead in the travelling lane and applies the brakes to help minimise a collision and if possible, helps prevent one.
Order above chaos. Preparedness rises over the unexpected. When you are attuned to your environment, you will more confidently move through it.

BLIND SPOT INTERVENTION® helps alert you to vehicles you may not see. If it detects a vehicle in your blind spot area, it warns you and can intervene to help you avoid a collision.

AROUND VIEW® MONITOR® lets you see your surroundings as though from above for an extraordinary level of awareness.
ADAPTIVE FRONT LIGHTING SYSTEM 1 turns your headlights to shed light on where you’re steering. The all-new LED headlights of the Infiniti Q70 do more than create a response—they respond.

LANE DEPARTURE PREVENTION 1,8 helps keep your vehicle from unintentionally drifting from your lane. Traffic may surround you, but so will confidence.

INTELLIGENT CRUISE CONTROL 1,7 automatically slows you down when traffic in front of you slows down. When the way is clear, it accelerates back to your desired speed. Less effort, more ease.

Free yourself to the possibilities of what’s ahead. Look forward with greater clarity and a powerful vision. Those who achieve their ambition are defined by their ability to see it.
INFINITI CONTROLLER allows you to command your technology in the manner you find most intuitive. Through buttons, turning ring or touchscreen, it responds to you rather than you conforming to the system.

BOSE® STUDIO SURROUND® envelops you, creating depth and ambience for a wider, more immersive sound. Music fills the cabin with soothing richness and thrilling intimacy.

CLIMATE-CONTROLLED SEATS surround you in greater comfort by pushing cool or warm air through the front seats to keep you entirely in your preferred temperature zone. Arrive at your destination refreshed and relaxed.

Step out of the routine and reach new heights of potential. Step from the Infiniti Q70 and find you have been moved in new ways. In the richness you touch, the space that surrounds, the sounds that invigorate, you will discover true reward is the transformation of refinement into rejuvenation.

Is there a more satisfying rarity than the recognition of your desires? Is there a more passionate automotive experience than when luxury recognises you?

INFINITI INTELLIGENT KEY custom-tailors your Infiniti Q70 to personalise every drive. Everything from the driver’s seat positioning to the outside mirrors and steering wheel settings accommodates to your presence without ever taking the key out from your pocket or purse.

WELCOME LIGHTING celebrates every return and elegantly draws you in to the driving experience. Upon your approach, a sequence of exterior then interior lights reward your presence. The ignition button will even illuminate with a pulsating glow, to let you know it’s ready to please and excite.
AMBIENCE
A welcoming and evocative space is measured by its ability to stir your emotions.

MATCHLESS MATERIALS The craftsmanship in an Infiniti Q70 is not limited to the exquisite ergonomics and trim. Your fingertips will seem to recognize an instinctively rewarding feel in the armrest and other surfaces. We took one-and-a-half years, surveying 360 people all over the world to quantify the most pleasing tactile feel. With tension and texture that match the depth and spacing of the ridges in your fingerprint, we’ve imbued the surfaces you’ll engage most with the perfect touch.

ABUNDANT SPACE The interior of the Infiniti Q70 was designed to emphasize both the rewards of spaciousness and the feeling of space. It offers excellent head and hip room for all passengers. Interior elements like the roof and windshield pillars are shaped to give a more open feeling. Each seat is rewardingly supportive and even taller rear passengers will have comfortable legroom. What’s more, a wide trunk opening gives you easy access to a spacious luggage compartment.

FINER FABRICS The seat belt is one of the few surfaces you continually touch, so we found a variable herringbone weave for the webbing that is softer than standard fabrics. Not only is it more pleasing to the touch, but being more compliant, it allowed us to reduce the friction of the seat belt mechanisms. The seat belt is more comfortable to wear, easier to pull out and even less likely to snag the thread of your finest fabrics. No element is too small.

AUDITORY INDULGENCE Each of the 16 speakers of the Bose® Studio Surround® sound system are custom-tuned for the interior of the Infiniti Q70. Every speaker, reproduces sound with legendary Bose® signal processing to create rich and realistic 5.1 surround sound imaging. The system also allows for a wide variety of media sources, including satellite radio, your personal iPod® and wireless streaming with a compatible Bluetooth®-enabled device.
**POWER**

Exceptional build quality, fuel efficiency and output can be measured with instruments or graphs, but the true excellence of Infiniti engines is in the feeling unleashed as you drive.

2.5-LITRE V6 PETROL ENGINE: One of the most formidable engines Infiniti has ever built, this powerful and responsive 2.5-litre V6 delivers a thrilling performance. It produces a stirring 219 horsepower and boasts 253Nm of torque to produce a torrent of power that is delivered with the polish and precision to suit virtually any driving scenario you might encounter or excitement you might desire.

3.5-LITRE V6 ENGINE WITH INFINITI DIRECT RESPONSE HYBRID®: The Infiniti Q70 Hybrid is the vehicle that redefined hybrid power. Combining a powerful V6 engine with a 50kW electric motor gives the system a total 360 horsepower. But unlike many hybrids, it transitions from all-electric mode to full-power hybrid mode with thrilling intensity and organic responsiveness. All while achieving a surprising 7.6 litres/100km.

3.7-LITRE V6 PETROL ENGINE: Its robust design, exceptional power-to-weight ratio, advanced technology and fuel efficiency have won it acclaim from critics and fans alike. Benefitting from Variable Valve and Event Lift (VVEL®) technology, it adjusts on the fly to make the most of every breath and every bit of fuel, resulting in a stirring 320 horsepower while achieving up to 10.2 litres/100km.
EFFICIENT INVIGORATION No hybrid design is quite like it, and none can match its emotional intensity. The 50kW electric motor and cutting-edge lithium ion batteries of the Infiniti Direct Response Hybrid®1 are powerful enough to allow you to maintain cruising speed in all-electric mode. When not needed, the 3.5-liter V6 petrol engine is turned off and completely disconnected, maximising mechanical efficiency. And yet, it responds to your call for power with a stirring intensity.

LIGHT ON ITS FEET These stunning 20-inch alloy wheels 1 heighten both the looks and performance of the Infiniti Q70. Lightweight, thanks to both material and design, they reduce unsprung weight. That reduction of mass makes driving more exciting by allowing the suspension to be more finely tuned and by making the handling of the Infiniti Q70 more responsive and more nimble.

CONTROL WITHOUT COMPROMISE When conditions are ideal, Intelligent All-Wheel Drive 1 sends 100% of the power to the rear wheels for more sporty response and performance. But it also constantly monitors wheelspin, throttle position and vehicle speed, and can divert up to 50% of the available power to the front wheels to enhance traction and control when conditions are less than optimal.

MORE RESPONSIVE BRAKING With ventilated discs and aluminium 4-piston opposed front calipers and 2-piston opposed rear calipers, the available Sport Brakes 1 provide great stopping force from both sides of the motor at the same time for better bite, more friction and direct feel.

THE SOUND OF PERFORMANCE A performance car speaks to you through its exhaust, and the specially exhaust tuning on the Infiniti Q70 shapes that sound into something uniquely compelling. Not only does it make an Infiniti unmistakable, it makes every trip up and down the tachometer an experience that transcends engineering and enters the realm of pure emotion.

INNATELY RESPONSIVE BALANCE The engineering philosophy behind Infiniti performance coupes and sedans, the Front-Midship Platform, also underlies the design of the spacious Infiniti Q70. Placing the engine’s center of mass just behind the front wheel center line creates a near-equal front-to-rear weight ratio, with a slight front bias that you’ll feel as quicker turn-in and even balance as you accelerate out of a corner. Experience precision and engagement you might expect from a sports car.

UNRIVALED PERFORMANCE Featuring a 1-motor, 2-clutch parallel hybrid powertrain, the Infiniti Q70 Hybrid is able to go from 0-100km/h in less than six seconds. Masterfully engineered, the high-speed motor control technology enables a seamless transition between the petrol engine and electric motor, providing a smooth and responsive ride with thrilling acceleration that goes beyond what was thought possible from a hybrid.

PERFORMANCE Underneath its alluring physique lies the foundation of the thrilling dynamics of Infiniti Direct Response performance engineering.
A SMARTER WAY TO SEE
The Adaptive Front lighting System on the Infiniti Q70 lights not just the way ahead, but around as well. It directs light toward corners by turning the headlights in coordination with steering input to help the driver see upcoming vehicles and pedestrians, and to help you reach your destination safely.

EXTEND YOUR AWARENESS
Engage reverse and the RearView Monitor displays the area directly behind. Coloured guidelines help give you an accurate sense of how close you are to objects behind, and they adjust as you turn, to show your path. Also, the Rear Sonar System emits a beeping tone and displays an icon on the RearView Monitor display when an obstacle appears near the rear bumper.

CRAFTING TRANQUILITY
Active Noise Control ensures that the cabin of the Infiniti Q70 offers better solace from the outside world. Intelligent technology uses a microphone in the ceiling to identify undesirable low-frequency engine sounds and neutralises them with sound waves of the opposite phase. The result is a quieter and more peaceful driving experience, which still preserves the more invigorating sounds of engine performance.

SECURING YOUR SPACE
Distance Control Assist employs a sensor to monitor the vehicle in front of you and helps you maintain a safe following distance. As your following distance becomes too short, the system can automatically engage the brakes as you release the accelerator pedal, and it can warn you if you need to brake. If your foot stays on the accelerator pedal while closing in on the other vehicle, it can push the pedal upwards to assist you in releasing it.

EASE IN TRAFFIC
Intelligent Cruise Control (Full-Speed Range) allows you to choose your desired speed, and automatically slows your vehicle in slowing traffic, going all the way to a complete stop. Then, as traffic flow picks up, it re-accelerates your vehicle to your preset speed. This visionary innovation and the personalised convenience it offers is available with a simple touch of a button.

ALL-AROUND AWARENESS
The Around View Monitor with Moving Object Detection and Front and Rear Sonar System gives you exceptional awareness of your environment as you park. You’ll see a simulated 360° view from above, showing you clearly the objects detected around your car. And the system will even alert you to moving objects detected in your vicinity. It intuitively puts you in touch with your surroundings, while simultaneously putting you at ease.

ENTERTAINMENT & ASSISTANCE
The advanced technologies of Infiniti InSuite simplify tasks and anticipate your needs as they keep you in touch with and in control of your world.
PROTECTION
The Infiniti Safety Shield® concept—our comprehensive approach to safety—layers technologies to monitor conditions, help you avoid a collision, and help protect you and your passengers if one occurs.

The Blind Spot Intervention® System uses sensors to help alert you to a vehicle detected entering the blind spot area in an adjacent lane and helps you avoid it. First, the warning light illuminates. Then, if you begin moving toward the occupied lane, a warning sounds. The system will even apply opposite side brakes to help you guide your vehicle back to the center of your current driving lane.

The Lane Departure Prevention System uses a camera to watch for departure from the traveling lane when you haven’t signalled, and audibly warns you if it’s detected. Then, if the drift continues, the system lightly applies selected brakes to help ease your vehicle back into the travel lane. But you never give up control. It’s designed to assist, not override.

Forward Emergency Braking employs a system to analyze if deceleration is required. Once detected, the driver is alerted visually and audibly. The accelerator pedal is pushed up and the brakes are applied to help slow the vehicle down. If there is a possibility of a collision, harder braking is applied. If unavoidable, the system engages the brakes and tightens the driver’s seat belt to reduce speed and damage.

In certain rear-end collisions, the Front-seat Active Head Restraints found on the Infiniti Q70 can move forward to help cushion the head to help assist in reducing whiplash-type injuries.

Ultra high-strength steel is used to help enhance your safety in the case of a collision. The unique process used to create this material can give it more than twice the tensile strength of conventional steel. Not only does this ultra-strong material add to the vehicle’s resiliency, it allows us to make the vehicle lighter overall.

Infiniti puts an array of air bags between you and an impact, including dual-stage front supplemental air bags of the Infiniti Advanced Air Bag System that adjust inflation rates based on the severity of the crash and seat belt usage. Also featured are front seat-mounted side-impact supplemental air bags and roof-mounted curtain side-impact supplemental air bags.

ALWAYS ALERT TO PROTECT YOU: Predictive Forward Collision Warning can warn you of a possible collision, even when the cause is obstructed from the driver’s view. It uses radar to continuously monitor and analyze the relative velocity and distance of not only the vehicle directly ahead of you, but of the vehicle in front of that one as well. If the system detects a potential risk, it provides an alert and tightens the driver’s seat belt to help restrain you.

Use for comparison only. 3 FCWS is intended to warn you before a collision occurs; it cannot prevent a collision. See Owner’s Manual for details. 4 FCWS cannot prevent accidents due to careless driving techniques. It may not provide warning or braking in certain conditions. 5 Please see Owner’s Manual for details. 6 PFCW is intended to warn you before a collision occurs; it cannot prevent a collision. See Owner’s Manual for details. 7 Intelligent Cruise Control is not a collision avoidance system; failure to apply the brakes could result in an accident. 8 LDW and LDPI cannot detect every vehicle or object. 9 LDW/LDP operate only when the lane markings are clearly visible on the road. Speed limitations apply. 10 Reverse Sensors can be effective in some situations but should not be relied upon as a sole means of parking. Always check surroundings, turn to look behind you before moving vehicle. 11 Rearview monitor may not detect all objects. Always check that it is safe to do so before moving vehicle. 12 Airbags are only a supplemental restraint system; always wear a seat belt. Even with the occupant-classification sensor, rear-facing child restraints should not be placed in the front passenger’s seat. All children 12 and under should ride in the rear seat properly secured in child restraints, booster seats, or seat belts according to their size. Airbags will only inflate in certain accidents; see your Owner’s Manual for more details.
Ultimate luxury is more than perfection. It is the feeling of unrestrained joy that unleashes something special in your heart. We at Infiniti believe there are times when reason should take a backseat and emotion—pure and primal—should be the driver. Tangibles play a part, of course: the sensual, flowing lines; the smell of leather; the visceral roar of the engine. Established in 1989, Infiniti has now grown to include sedans, coupes, convertibles, crossovers and SUVs in its lineup and reaches across 50 countries worldwide. Infiniti has generated respect as the provocateur brand in the premium category, with a reputation for defying convention and creating irresistible and provocative automobiles, engineered with obsessive attention to detail. All of which contributes to the feeling that to drive an Infiniti is something special.
